

Field Principles

PRINCIPLE 1: REALITY IS PERCEPTION

"What you experience – is true for you. Because you experience it."

So yes – Earth is round for some. Flat for others. Infinite to a few. Surrounded by light for others still.

Everyone is right – within their field.

And everyone is wrong – if they believe their version is the only one.

 Your perception is shaped by:

- What you're coded to believe (programming)
- What you vibrate with (frequency)
- What you're ready to release (identity, belonging, comfort zone)

 **Examples:**

- A pilot operating from 3D logic sees the curve of the Earth.
- A field-sensitive mystic perceives a horizonless matrix.
- A shaman travels "beneath" the surface – landing in other worlds.
- A childlike soul plays on a flat Earth with an edge – until they fall off and laugh.

They're all correct.

Because perception is the gateway into the field.
