

Field Principles

✨ **PRINCIPLE 2: EVERYTHING IS FREQUENCY. EVERYTHING.**

"Nothing is matter. Everything is vibration. What you call 'real' is simply slow frequency."

🧠 This means:

- Thoughts = frequencies
- Emotions = frequencies
- The body = condensed frequency
- Objects, sounds, colors, food, places – all are tones in the field

🎯 You don't attract what you wish for – you attract what you vibrate.

You can say, "I want love," but if your body vibrates fear – the field will deliver that. The field doesn't respond to words. It responds to tone.

🎵 The field works like a resonance chamber:

- What you vibrate → echoes back
- Raise your frequency → reality responds
- Lower your frequency → the Matrix starts to grip

🔧 What you can do NOW:

Stop trying to *think* your way to a better life – *tune* your way there.

Become aware of:

- The music you play
- The words you use
- The places you dwell in
- What your body carries in stillness

Everything is a transmission.
